month warranty

Artwork Guidelines

Artwork Specifications

Minimum resolution for artwork is 300dpi (final product will depend on resolution)

Artwork must be line art (in the following file formats: .AI, .JPEG, .EPS, .PSD; or .PDF

Artwork no matter what shape, must be sized to fit within an area of 120mmx120mm (image will expand up to 25% once balloon is inflated).

Any vector artwork including text must be converted to paths to prevent substitution/distortion. If the artwork is not supplied in the fore mentioned formats, then an art work manipulation fee may be incurred.

Print Direction

Neck Down
For balloons inflated with Helium
or attached to Cups & Sticks

Neck Up
For balloons inflated with
air for suspending.

Artwork Format

FIGURE 1

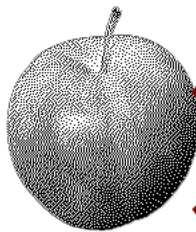

FIGURE 2

FIGURE 3

All artwork must be supplied in a black & white line art format and only then will be deemed as "camera ready". Gradient or Halftone artwork is not regarded as camera ready. If artwork requires any manipulation an additional art charge may apply and require additional production time.
